Weather-Related Pool Opening Criteria

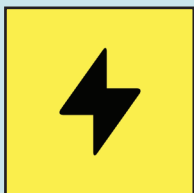

Under normal conditions, the JCC pool will be open YEAR-ROUND when the temperature is 32° F or above. The JCC will use The Weather Channel as the “official” source for the current temperature.

To check the current temperature that will determine whether the pool is open:

- Visit www.weather.com
- Download The Weather Channel app on your mobile device
- For the desired location, enter the JCC zip code: 87109

The pool also will be closed if any of the following conditions exist:

- Lightning*
- Visibility conditions which obscure the pool bottom
- Other inclement weather, such as hard rain or heavy snow
- When in doubt whether the pool is open, call the JCC front desk: 505-332-0565

*For the latest information on lightning-related pool closures, you can download the My Lightning Tracker app. Pool will close when lightning is 8 miles out or less, for 30 minutes. The 30-minute timer will reset every time a strike occurs within that 30 minutes.
